

Takashi Yoshimura

Full-Stack Web Developer

Tokyo, Japan | Age: 30

SUMMARY

Full-stack web developer with extensive experience building scalable web applications, cloud-native services, and SaaS products. Proficient across a wide range of programming languages and frameworks, with strong expertise in backend systems, frontend development, database design, and cloud infrastructure on GCP and AWS. Experienced in machine learning integration, agile Scrum workflows, and open-source software contribution.

TECHNICAL SKILLS

Programming Languages

Rust, Haskell, JavaScript, TypeScript, Nim, Elm, Elixir, PHP, Golang, Java, Python, Swift, C++, Bash

Frameworks & Libraries

Actix-web, Rocket, Vue.js, React.js, jQuery, Express, Koa, Laravel, CakePHP, Ruby on Rails, Django, Tornado, Flask, TensorFlow (Keras)

Databases

MySQL, PostgreSQL, Redis, memcached, MongoDB, SQL

Cloud & Infrastructure

Google Cloud Platform (GCP), Amazon Web Services (AWS), Cloudflare, Fastly

Core Competencies

Full-Stack Development, Machine Learning, API Design, Scrum, OSS Contribution, Software Testing, Mobile & iOS Development, SaaS Development

Verified Skills

Google Cloud Platform (GCP), Django, MongoDB (LinkedIn Skill Assessments passed)

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer

Jul 2017 - Present

Grandstar inc - Tokyo, Japan

Design and develop full-stack web applications and cloud-based services for diverse client projects. Build custom software solutions spanning web, mobile, and SaaS platforms.

- Develop and maintain web applications using modern JavaScript/TypeScript frameworks (React.js, Vue.js) and backend stacks (Django, Ruby on Rails, Laravel, Express).
- Architect and deploy cloud-native applications on GCP and AWS with Cloudflare and Fastly for performance and reliability.
- Design and optimize database schemas and queries across MySQL, PostgreSQL, Redis, and MongoDB.
- Build RESTful APIs and integrate third-party services for custom software and SaaS products.
- Apply machine learning techniques using TensorFlow/Keras for data-driven features.
- Contribute to open-source projects and follow Scrum agile methodologies.

Technologies: JavaScript, TypeScript, Python, PHP, Golang, Rust, React.js, Vue.js, Django, Ruby on Rails, Laravel, GCP, AWS, PostgreSQL, MongoDB, Redis

EDUCATION

Osaka Institute of Technology

2014 - 2018

Bachelor's degree studies in engineering and technology.

SERVICES & SPECIALIZATIONS

Application Development, Web Development, Custom Software Development, Cloud Management & Cloud

Application Development, Database Development, Software Testing, Mobile Application Development, iOS Development, SaaS Development
